

## Elevator Pitch

**DOKO Battlefield** is a tech-powered, immersive combat sports experience where tradition meets innovation. Guests step through a digital portal into a Japanese-inspired indoor world filled with blossom trees, dojos, VR arenas, and cultural design — all while training in ancient warrior disciplines like kendo, fencing, archery, dagger, and axe throwing.

It's more than entertainment — it's a space where **combat becomes community**. Every visitor wears a **tech wearable** that acts as their personal ID, tracks their place in line, alerts them when it's time to compete, and stores personalized media from training and performance rooms.

We're launching our flagship location in Atlanta and seeking visionary partners, creatives, and funders to help bring this cultural movement to life — and eventually expand it across cities.
